Tracking Website

- General Description

Development of a comprehensive website that will include an advanced administration panel for tracking and managing calls, as well as the ability to obtain detailed statistics of the service. The site will be fully customizable, ensuring that it fits the specifications and growth of your company.

- Functionalities

- **Administration Panel:**
 - Management of call tracking services, including the registration of total calls, missed calls, and contact messages.
 - Tools for evaluating the quality of contacts and determining potential customers.
- **Statistics and Analysis:**
 - Tracking of total site visits, analysis by service and section, and blogs.
 - If applicable, detailed statistics of quotes and/or online store.
- **Content Management:**
 - Tools for the administration of categories, products, users, and general site settings.
- **Customization and Scalability:**
 - Custom development to ensure perfect integration with your processes and scalability for future growth.

- Price

- \$8,760.00 (eighth thousand seven hundred sixty) dollars.
- **Conditions:** 50% advance and the balance against final delivery.

- Terms and Conditions

The estimated development time will be agreed upon once the full scope of the project is defined.

The Tracking Website does not include the monthly costs for the use of Call Tracking service.
